

Edelstahl-Reiniger FL 3000

Cleaner for swimming pools made of stainless steel

- Highly concentrated
- Developed specifically for cleaning stainless steel
- Particularly suitable for persistent mineral deposits

Product description

Stainless Steel Cleaner FL 3000 effortlessly removes oils and greases as well as lime and deposits from wintering. Also the day/night line is removed with ease. FL 3000 dissolves traces of rust from e.g. hair clips and discoloration from e.g. copper coins.

Application

The cleaner is applied over a wide area with an acid-proof sprayer or roller. The contact time for stainless steels is between 30 and 60 minutes. Do not process under heat.
