

EW-Overall A40 mit Kapuze

Against particles and chemical splashes EN 1149, EN 1073-2

- type 5/6
- EN 1149
- EN 1073-2
- cat. III

Product description

This overall with hood and full-length zip is made of ultra-strong, silicone-free, anti-static material and is very low linting. It provides protection against chemical splashes and particles. The laminate film offers high protection against numerous chemicals (type 6), >99 % particle-proof against fibres over 1 µm (type 5). Strong triple seams increase tear resistance. The hood design allows wearing a mask and freedom of movement. For even stronger protection, it should be worn in combination with our acid-proof apron.

The coverall is particularly well suited for critical environments in production, e.g. in the pharmaceutical sector, when handling chemicals, in the processing industry as well as in electronic manufacturing.
