

Handdruck-Sprüher

Chemical-resistant 2 LI

Product description

The Hand Pressure Sprayer can be used to spray most cleaning and pickling products. This tool enables stainless steel processors to move away from conventional manual processing methods and to treat small VA components such as constructions, equipment, apparatuses and, above all, surfaces in addition to tarnishing and scaling easily and economically. The capacity is approx. 2 LI.

The Hand Pressure Sprayer was specially developed for aggressive substances.

Application instructions

Rinse the Hand Pressure Sprayer with clear water after use and never leave it unused under pressure for long periods.
