

# REMBA Neutralreiniger

Neutralisation of surfaces

- Neutralises the surface
- Cleaning without water
- Dissolves nicotine and soot
- Easy disposal

## Product description

Used to neutralise and clean metal surfaces after using pickling tapes or REMBA Cleaning Wipes. The cleaner also removes light soiling such as nicotine and soot. A pH test strip can be used to test the surface for neutrality. REMBA Neutral Cleaner is not a hazardous product, is not flammable and is not classified according to GHS.

## Application

REMBA Neutral Cleaner can be used for cleaning of all kinds.

The surface wetted with acid is sprayed thoroughly and then wiped with a soft cloth. The surface is now clean and neutral.

The stainless steel surface is protected from further soiling with REMBA Finishing Oil, giving it an even, streak-free and shiny appearance.
