

# REMBA Reinigungstücher

Removes rust from stainless steel

- Removes corrosion and salt deposits
- Cleans and maintains
- Especially for polished stainless steel
- No waste water

## Product description

REMBA Cleaning Wipes clean and maintain. They remove corrosion and salt deposits. They are particularly suitable for polished stainless steel. No waste water is produced during use.

## Application

The stainless steel surface is wiped evenly with the cleaning wipe. This spreads the liquid over the surface.

After a contact time of approx. 5 minutes, wipe the surface with the same cleaning wipe. Corrosion and salt deposits are removed. If not all soiling is removed, simply extend the contact time and wipe again after 5 minutes.

Neutralise cleaned surfaces with REMBA Neutral Cleaner and seal with REMBA Finishing Oil.
